Counsel: [*1] Peter Mario Goico, Plaintiff, Pro se, Wichita, KS.

Judges: JULIE A. ROBINSON, UNITED STATES DISTRICT JUDGE.

Opinion by: JULIE A. ROBINSON

Opinion

MEMORANDUM AND ORDER

Plaintiff Peter Mario Goico brings this action *pro se* against Defendants, the U.S. Food and **Drug** Administration and its Commissioner, Stephen M. Hahn (collectively, the "FDA"), alleging that the FDA is

unlawfully withholding hydroxychloroquine ("HCQ") for the prevention of the SARS-CoV-2 ("COVID-19") virus. This case is now before the Court on Plaintiff's Motion to Join this Case with Case 20-1025 (Doc. 3), Plaintiff's Emergency Motion for Preliminary Injunction (Doc. 4), Plaintiff's Motion to Rebut (Doc. 20), the FDA's Motion to Dismiss for Lack of Subject Matter Jurisdiction and Failure to State a Claim Upon Which Relief Can Be Granted (Doc. 22), Plaintiff's Emergency Motion to Expedite Ruling on Defendants' Motion (Doc. 29), Plaintiff's Urgent Emergency Motion for Emergency TRO (Doc. 30), and Plaintiff's Motion for Permission to File a Rebuttal (Sur-Reply or Sur-Response) to [the FDA's] Reply Memorandum **in** Support of Defendants' Motion to Dismiss (Doc. 32). For the reasons explained **in** detail below, Plaintiff's motion for leave to file a sur-reply [*2] is granted, the FDA's motion to dismiss is granted, this case is dismissed, and Plaintiff's remaining motions are denied as moot.

I. Factual and Procedural History

Plaintiff is a resident of Wichita, Kansas. He filed his Complaint on September 16, 2020, alleging causes of action purportedly arising under: (1) [21 U.S.C. § 360bbb-3](#), which is the federal statute pursuant to which the FDA may issue an emergency **use** authorization ("EUA") for **drugs** and other FDA-regulated products; (2) the Administrative Procedure Act, [5 U.S.C. §§ 701-706](#); and (3) [28 U.S.C. § 1343](#) for the deprivation of his civil rights. **In** his Statement of Claim, Plaintiff contends that

[t]he Food and **Drug** Administration is effectively holding me and my seventy-five year old father under illegal house arrest by withholding a **drug** (hydroxychloroquine) necessary to leave. They may not be **using** bars and guns to keep us restrained; they are **using** the Covid-19 virus, which can be equally deadly, especially **in** Kansas where Covid-19 is rapidly spreading. We live **in** constant danger

of contracting and dying from the Covid-19. . . . This is all because the FDA is withholding a prophylaxis called hydroxychloroquine. This medication is provably safer than some over the counter drugs . . . [*3] [and] has been used for sixty-five years (with FDA approval) for malaria prevention Meanwhile, I have spoken to at least five medical professional[s] who refuse to give either of us a prescription due to it being deemed "unsafe". This declaration of "unsafe" is without any basis by the FDA while there are tests that prove it is not only safe but effective. . . .¹

Plaintiff argues that his civil rights are being violated, seeks declaratory judgment pursuant to [28 U.S.C. §§ 2201-2202](#), and requests that this Court "enjoin the FDA from disallowing prophylaxis [sic] use of hydroxychloroquine and enjoin any medical authority from punishing any doctor who prescribes hydroxychloroquine as a prophylaxis for COVID-19."²

Before the FDA appeared in this case, Plaintiff filed an "Emergency Motion for Preliminary Injunction" seeking such relief.³ Because Plaintiff titled his pleading as an "emergency" motion, the Court examined whether Plaintiff had satisfied his heavy burden in seeking a temporary restraining order ("TRO") without notice under [Fed. R. Civ. P. 65\(b\)\(1\)](#). In a September 22, 2020 Order, the Court found that Plaintiff had not met that burden because he failed to make a sufficient showing that he would suffer irreparable and [*4] immediate harm before the FDA could be heard in opposition to his motion.⁴ The Court ordered the FDA to respond to Plaintiff's motion for a preliminary injunction on or before October 20, 2020.

Rather than awaiting the FDA's response to his motion for a preliminary injunction, Plaintiff filed a second "Emergency Motion for TRO."⁵ The Court denied that motion on September 28, 2020, and ordered that the October 20, 2020 deadline for the FDA's response to Plaintiff's motion for a preliminary injunction would remain in effect.⁶ Plaintiff then filed an "Addendum to

Emergency Motion for TRO" and a "Motion to Rebut," which seeks reconsideration of the Court's denial of his second request for a TRO.⁷

On October 20, 2020, the FDA filed a motion to dismiss for lack of subject matter jurisdiction and failure to state a claim, along with its opposition to Plaintiff's motion for a preliminary injunction.⁸ In its motion to dismiss, the FDA raises lack of standing and subject matter jurisdiction, which are threshold issues. On October 21, 2020, the Court issued an Order stating that because it must assure itself of its own jurisdiction before proceeding to any request for injunctive relief, it would decide [*5] the FDA's motion to dismiss before ruling on Plaintiff's motion for a preliminary injunction.⁹

The Court ordered Plaintiff to file both his response to the FDA's motion to dismiss and his reply in support of his motion for a preliminary injunction on or before November 10, 2020, and the FDA to file its reply in support of its motion to dismiss within fourteen days of Plaintiff's response. Plaintiff instead filed his response the same day, October 21, followed by an emergency motion to expedite the Court's ruling on the FDA's motion to dismiss, another emergency motion for a TRO, a motion for leave to file a sur-reply in opposition to the FDA's motion to dismiss, and a pleading titled "Rebuttal Evidence."¹⁰ Ultimately, the Court need only address the FDA's motion to dismiss—and within that motion, only the FDA's standing arguments—as explained below.

II. Legal Standard

The FDA moves to dismiss this case pursuant to [Fed. R. Civ. P. 12\(b\)\(1\)](#) for lack of subject matter jurisdiction, arguing, among other things, that Plaintiff has failed to satisfy the constitutional minimum requirements of standing necessary to bring suit. As explained in greater depth below, Plaintiff's standing is properly challenged by a [Rule 12\(b\)\(1\)](#) motion [*6] "because a party's standing implicates subject matter jurisdiction."¹¹

¹¹ See [Unicredit Bank AG v. Jue-Thompson, No. 12-2468-EFM, 2013 U.S. Dist. LEXIS 167818, 2013 WL 6185750, at *3 \(D. Kan. Nov. 26, 2013\)](#) (quoting [McCullum v. W. Elk Sch. Bd.](#)

Generally, a [Rule 12\(b\)\(1\)](#) motion to dismiss for lack of subject matter jurisdiction takes one of two forms: a facial attack or a factual attack. "First, a facial attack on the complaint's allegations as to subject matter jurisdiction questions the sufficiency of the complaint. *In* reviewing a facial attack on the complaint, a district court must accept the allegations *in* the complaint as true."¹²

"Second, a party may go beyond allegations contained *in* the complaint and challenge the facts upon which subject matter jurisdiction depends. When reviewing a factual attack on subject matter jurisdiction, a district court may not presume the truthfulness of the complaint's factual allegations. A court has wide discretion to allow affidavits, other documents, and a limited evidentiary hearing to resolve disputed jurisdictional facts under [Rule 12\(b\)\(1\)](#)."¹³

In considering "a factual attack under [Rule 12\(b\)\(1\)](#), a court's reference to evidence outside the pleadings does not convert the motion into a [Rule 56](#) [summary judgment] motion."¹⁴ As the party seeking to invoke federal jurisdiction, Plaintiff bears the [*7] burden of proving jurisdiction as a threshold matter.¹⁵

Because Plaintiff proceeds *pro se*, some additional considerations frame the Court's analysis. The Court must construe Plaintiff's pleadings liberally and apply a less stringent standard than that which applies to attorneys.¹⁶ "Nevertheless, [Plaintiff] bears 'the burden of alleging sufficient facts on which a recognized legal

claim could be based."¹⁷ The Court may not provide "additional factual allegations to round out a plaintiff's complaint or construct a legal theory on a plaintiff's behalf."¹⁸ Additionally, a *pro se* litigant is not excused from complying with the rules of the court and is subject to the consequences of noncompliance.¹⁹

III. Discussion

A. Background Concerning FDA *Drug* Approval, Off-Label *Use*, EUAs, and Hydroxychloroquine for the Treatment of COVID-19

The FDA's motion to dismiss for lack of subject matter jurisdiction is brought as a factual attack, as the FDA asks the Court to take judicial notice of its EUA for HCQ for the treatment of COVID-19, the revocation of that EUA, and other relevant documents on the FDA's website. "The court can take judicial notice of information on government websites that [*8] is not 'subject to reasonable factual dispute and is capable of determination *using* sources whose accuracy cannot reasonably be questioned."²⁰ The Court takes judicial notice of these documents and explains certain background information and events underlying the present dispute.

Under the Federal Food, *Drug*, and Cosmetic Act ("FDCA"), the FDA must approve a new *drug* before it may be *lawfully* sold.²¹ "To . . . obtain FDA approval, a

Bureau of Land Mgmt., 565 F.3d 683, 702 n.22 \(10th Cir. 2009\)](#) (citing [Doe v. Heil, 533 F. App'x 831, 833 n.2 \(10th Cir. 2013\)](#)).

²¹ See [21 U.S.C. § 355\(a\)](#); [Weinberger v. Hynson, Westcott & Dunning, Inc., 412 U.S. 609, 613, 93 S. Ct. 2469, 37 L. Ed. 2d 207 \(1973\)](#); [Hope Med. Enters., Inc. v. Fagron Compounding Servs., LLC, No. 2:19-cv-07748-CAS\(PLAx\), 2020 U.S. Dist.](#)

new **drug** must undergo an extensive application and approval process.²² A manufacturer seeking approval of its product must submit evidence that the product is both safe and effective under the conditions prescribed **in** the proposed labeling.²³ And when the FDA approves a new **drug**, it is approving it as safe and effective for the specific conditions of **use** set forth **in** the labeling.²⁴

However, physicians may exercise their independent **medical** judgment to prescribe FDA-approved **drugs** to treat conditions other than those for which the **drug** is approved, if appropriate for the particular patient.²⁵

Absent state regulation, once a **drug** has been approved by FDA, doctors may prescribe it [*9] for indications and **in** dosages other than those expressly approved by the FDA. This is a widely employed **practice** known as "off-label" **use**. Off-label **use** does not violate federal law or FDA regulations because the FDA regulates the **marketing** and distributing of **drugs in** the United States, not the **practice of medicine**, which is the exclusive realm of the individual states.²⁶

When necessary to respond to "an actual or potential emergency," the FDA may issue an EUA for **unapproved drugs**, or for **unapproved uses** of approved **drugs**, under certain circumstances and for the duration of the emergency, provided that certain statutory criteria are met.²⁷ Among other criteria, an EUA requires that the **drug's** known and potential

benefits outweigh its known and potential risks.²⁸ EUAs must be periodically reviewed, and the FDA must revoke or revise an EUA if the statutory criteria are no longer satisfied or public health and safety so require.²⁹

HCQ is approved by the FDA to prevent and treat malaria and to treat lupus erythematosus and rheumatoid arthritis.³⁰ Although HCQ is not approved to prevent or treat COVID-19, preliminary data at the outset of the pandemic suggested that it might be effective [*10] against the virus.³¹ On March 28, 2020, the FDA found that HCQ met the statutory criteria and issued an EUA for its **use** "to facilitate the availability of . . . hydroxychloroquine sulfate during the COVID-19 pandemic to treat patients for whom a clinical trial is not available or participation is not feasible."³² The EUA applied only to hospitalized patients.³³ Further, the EUA applied only to HCQ supplied from the Strategic National Stockpile ("SNS"),³⁴ which consists "of **drugs**, vaccines and other biological products, **medical** devices, and other supplies . . . to provide for and optimize the emergency health security of the United States."³⁵ The FDA's EUA issuance letter says nothing

³⁴ *Id.* at 1, 5-7. The EUA also applied to chloroquine phosphate to be distributed from the SNS. See *id.* at 1.

³⁵ [42 U.S.C. § 247d-6b\(a\)\(1\)](#) (establishing SNS).

about commercial supplies of HCQ.

On June 15, 2020, the FDA revoked its EUA for HCQ distributed from the SNS, finding that the criteria for the EUA's issuance were no longer met.³⁶ The FDA stated in its EUA Revocation that it had concluded that hydroxychloroquine was not likely effective in treating COVID-19, and that in light of reports of serious adverse events, the drug's potential benefits did not outweigh its risks.³⁷ Critically, the FDA's EUA Revocation expressly states that "[w]hile HCQ that has [*11] been distributed from SNS is no longer authorized under the EUA . . . to treat hospitalized patients for COVID-19, FDA-approved HCQ can be distributed in interstate commerce."³⁸ And when announcing the EUA Revocation, the FDA issued a press release stating that "FDA approved products may be prescribed by physicians for off-label uses if they determine it is appropriate for treating their patients, including during COVID."³⁹

On July 1, 2020, the FDA published a review of safety issues with the use of HCQ to treat hospitalized patients with COVID-19.⁴⁰ In that update, the FDA explained:

Hydroxychloroquine and chloroquine have not been shown to be safe and effective for treating or preventing COVID-19. They are being studied in

³⁶ U.S. Food & Drug Admin., Letter and Memorandum Revoking Emergency Use Authorization for Use of Chloroquine Phosphate or Hydroxychloroquine Sulfate Supplied from the National Stockpile for Treatment of 2019 Coronavirus Disease 1, 15 (June 15, 2020), <https://www.fda.gov/media/138945/download> [hereinafter "EUA Revocation"].

³⁸ *Id.* at 2.

³⁹ U.S. Food & Drug Admin., FDA News Release, Coronavirus (COVID-19) Update: FDA Revokes Emergency Use Authorization for Chloroquine and Hydroxychloroquine (June 15, 2020), <https://www.fda.gov/news-events/press-announcements/coronavirus-covid-19-update-fda-revokes-emergency-use-authorization-chloroquine-and>

⁴⁰ U.S. Food & Drug Admin., FDA Cautions Against Use of Hydroxychloroquine or Chloroquine for COVID-19 Outside of the Hospital Setting or a Clinical Trial Due to Risk of Heart Rhythm Problems (July 1, 2020), <https://www.fda.gov/drugs/drug-safety-and-availability/fda-cautions-against-use-hydroxychloroquine-or-chloroquine-covid-19-outside-hospital-setting-or>

clinical trials for COVID-19, and we authorized their temporary use during the COVID-19 pandemic for treatment of the virus in hospitalized patients when clinical trials are not available, or participation is not feasible, through an [EUA]. The medicines being used under the hydroxychloroquine/chloroquine EUA are supplied from the Strategic National Stockpile, the national repository of critical medical supplies to be used during public health emergencies. This safety [*12] communication reminds physicians and the public of risk information set out in the hydroxychloroquine and chloroquine healthcare provider fact sheets that were required by the EUA.

Hydroxychloroquine and chloroquine can cause abnormal heart rhythms such as QT interval prolongation and a dangerously rapid heart rate called ventricular tachycardia. These risks may increase when these medicines are combined with other medicines known to prolong the QT interval, including the antibiotic azithromycin, which is also being used in some COVID-19 patients without FDA approval for this condition. Patients who also have other health issues such as heart and kidney disease are likely to be at increased risk of these heart problems when receiving these medicines.⁴¹

The update provided guidance for physicians treating patients enrolled in clinical trials, and otherwise advised that "[i]f a healthcare professional is considering use of hydroxychloroquine . . . to treat or prevent COVID-19, FDA recommends checking www.clinicaltrials.gov for a suitable clinical trial and consider enrolling the patient. Consider using resources available to assess a patient's risk of QT prolongation and mortality."⁴²

B. Standing Principles

Article III of the Constitution gives federal courts the power to exercise jurisdiction only over "Cases" and "Controversies." As the Supreme Court has explained:

In limiting the judicial power to "Cases" and "Controversies," Article III of the Constitution restricts it to the traditional role of Anglo-American courts, which is to redress or prevent actual or imminently threatened injury to persons caused by

⁴¹ *Id.*

⁴² *Id.* [*13]

private or official violation of law. Except when necessary *in* the execution of that function, courts have no charter to review and revise legislative and executive action.⁴³

One of several doctrines reflecting Article III's case-or-controversy limitation on judicial power is the doctrine of standing.⁴⁴ That doctrine requires federal courts, before considering the merits of an action, to "satisfy themselves that 'the plaintiff has "alleged such a personal stake *in* the outcome of the controversy" as to warrant [the plaintiff's] invocation of federal-court jurisdiction."⁴⁵

To establish Article III standing, a plaintiff must show: (1) injury *in* fact, (2) causation, and (3) redressability.⁴⁶ To establish the first element, "a plaintiff must show that he or she suffered 'an invasion of a legally protected interest' that is 'concrete [*14] and particularized' and 'actual or imminent, not conjectural or hypothetical.'"⁴⁷ "[T]he injury must affect the plaintiff *in* a personal and individual way."⁴⁸ "The 'injury *in* fact' requirement is satisfied differently depending on whether the plaintiff seeks prospective or retrospective relief."⁴⁹ "To seek prospective relief, the plaintiff must be suffering a continuing injury or be under a real and immediate threat of being injured *in* the future."⁵⁰ As to the second element of standing, "there must be a causal connection between the injury and the conduct complained of—the

injury has to be 'fairly . . . trace[able] to the challenged action of the defendant, and not . . . th[e] result [of] the independent action of some third party not before the court.'"⁵¹ Finally, as to the third element, "it must be 'likely,' as opposed to merely 'speculative,' that the injury will be 'redressed by a favorable decision.'"⁵² At the pleading stage, the plaintiff "must 'clearly . . . allege facts demonstrating' each element" of standing.⁵³

C. Goico Lacks Standing and this Case Must Therefore Be Dismissed

The FDA argues that Plaintiff lacks standing to sue because he has suffered no injury *in* fact, let alone an [*15] injury traceable to the FDA, and because his alleged injury would not be redressed by the injunctive relief he seeks. The Court agrees that Plaintiff has failed to allege facts demonstrating standing.

Assuming only for the sake of argument that Plaintiff has adequately alleged an injury-*in*-fact due to his inability to obtain HCQ, he still cannot establish the remaining two standing requirements—causation and redressability—because the FDA is not withholding HCQ or preventing physicians from prescribing it as he alleges. Some of Plaintiff's arguments are set forth *in* his proposed sur-reply and *in* his pleading titled "Rebuttal Evidence."⁵⁴ Although these are improper pleadings, the Court will exercise its discretion to grant Plaintiff leave to file his sur-reply, the sur-reply will be deemed filed as of the date of this Order, and the Court will consider both pleadings here *in* the interests of judicial efficiency and finality.⁵⁵ The Court nonetheless

⁵⁵ "Under D. Kan. Rule 7.1(c), briefing on motions is limited to the motion (with memorandum *in* support), a response, and a reply. Surreplies are not typically allowed." [COPE v. Kan. State Bd. of Educ.](#), 71 F. Supp. 3d 1233, 1238 (D. Kan. 2014) (citation omitted). "Leave to file a surreply is generally only granted *in* 'rare circumstances' such as where the movant 'improperly raises new arguments *in* a reply.'" [Sheldon v.](#)

finds Plaintiff's arguments unavailing.

First, Plaintiff cannot establish the causation element of standing. As explained above, while the FDA has revoked the EUA for HCQ supplied from the SNS, HCQ remains an FDA-approved [*16] **drug**, is commercially available, and may be prescribed off-label where deemed appropriate by a physician *in* his or her independent **medical** judgment. As recently explained by another court when denying injunctive relief similar to that requested here:

Hydroxychloroquine is commercially available, and physicians are free to prescribe the **drug** for off-label **uses** absent any direction to the contrary by state **medical** authorities. Nothing *in* the EUA, or its revocation, had any direct impact on the availability of hydroxychloroquine *in* the commercial **market**.⁵⁶

The independent decision of a third-party **medical** professional not to prescribe HCQ is not fairly traceable to the FDA.⁵⁷

Plaintiff ultimately acknowledges the fact that HCQ can be legally prescribed for off-label **use**,⁵⁸ but alleges that the multiple doctors he has consulted will not prescribe the **drug** for him because they deem it unsafe based on the FDA's statements and/or because they fear sanctions from state **medical** authorities. However, Plaintiff's own evidence is unhelpful to his argument that physicians are precluded from prescribing HCQ for the

⁵⁸ Doc. 26 at 4.

treatment of COVID-19 by either the FDA [*17] or state authorities.

Plaintiff's "Rebuttal Evidence" pleading consists of an email Plaintiff received from a research analyst at the Kansas Legislative Research Department outlining statements by various state **medical** authorities on best **practices** during COVID-19.⁵⁹ The gist of these statements is that while "there is no prohibition on legal 'off-label' prescribing," **drug**-therapy decisions should be evidence-based and comply with the standard of care.⁶⁰ While some states may be imposing certain restrictions on the **use** of HCQ to prevent or treat COVID-19, Plaintiff offers no evidence that Kansas is one of them beyond a statement by the Kansas Board of Pharmacy "encourag[ing] vigilance *in* processing new prescriptions for . . . hydroxychloroquine and recommend[ing] reaching out to prescribers to verify diagnosis."⁶¹ Nowhere does Plaintiff support that state authorities are preventing Kansas doctors from prescribing HCQ against "their own free will," as he asserts.⁶²

Even if Plaintiff offered evidence that Kansas **medical** authorities have restricted or forbidden the **use** of HCQ for off-label **use**, those actions would not be fairly traceable to the FDA, nor does the agency wield authority over state [*18] regulators who might discipline physicians for prescribing HCQ because the regulation of **medical practice** is generally within the states' exclusive authority.⁶³ Protecting the public health

⁶³ See, e.g., [Planned Parenthood Cincinnati Region v. Taft, 444 F.3d 502, 505 \(6th Cir. 2006\)](#); [Assoc. of Am. Physicians & Surgeons v. FDA, No. 20-1784, 2020 U.S. App. LEXIS 30622, 2020 WL 5745974, at *2 \(6th Cir. Sept. 24, 2020\)](#) (stating that "state **medical** boards—not [the FDA]—control how physicians can prescribe or **use drugs**," and that the FDA "cannot be held responsible for the allegedly threatening regulatory environment surrounding [HCQ's] **use**"); [Assoc. of Am. Physicians & Surgeons v. FDA, No. 1:20-CV-493, 2020 U.S. Dist. LEXIS 178454, 2020 WL 5742698, at *8 \(W.D. Mich. Aug. 14, 2020\)](#) ("[Plaintiff's contentions illustrate that its members[] grievances lie against the state authorities, not the federal defendants here. Any traceability from the potential and speculative complained of injury . . . is too indirect and cut off by independent actors making independent decisions.").

by assuring **drug** safety is an integral part of the FDA's mission.⁶⁴ The fact that the FDA has warned healthcare providers and the public of some potential risks of HCQ—and that some state authorities may have restricted the **use** of the **drug** or some physicians may have chosen not to prescribe it for the treatment of COVID-19 because of those risks when weighed against the **drug's** potential benefits—does not establish the causal link necessary to confer standing on Plaintiff here.

Plaintiff also argues that the FDA has caused HCQ to be **in** short supply by "hoarding" it **in** the SNS.⁶⁵ Not only does this statement about HCQ scarcity appear to be false as of the date of this Order,⁶⁶ Plaintiff does not allege **in** his Complaint that physicians are *unable* to prescribe him HCQ due to a shortage; rather, he alleges that they are *unwilling* to prescribe him the **drug**. Nor does he allege that he was or is a person who would have been eligible for treatment with HCQ under [*19] the EUA. Plaintiff has simply failed to allege a causal connection between his injury and the FDA's conduct sufficient to establish standing.

Second, Plaintiff has failed to satisfy the redressability element of standing because he cannot show that it is likely rather than speculative that his injury would be redressed by a decision **in** his favor. **In** his Complaint, Plaintiff requests that the Court enjoin the FDA from disallowing HCQ for prophylactic **use** and enjoin any **medical** authority from punishing any doctor who prescribes HCQ. As discussed above, the FDA is not disallowing the **use** of HCQ, nor does the FDA have anything to do with the state's regulation of **medical practice**. The unspecified "**medical** authorities" to which Plaintiff refers are not parties to this action and the Court therefore has "no power to adjudicate a

personal claim or obligation" against them.⁶⁷

In his response to the FDA's motion to dismiss, Plaintiff appears to alter his request for injunctive relief by asking that that Court order the FDA to release HCQ from the SNS. This change **in** tactic fails because, among other reasons, even if the Court were to order the release of HCQ from the SNS, [*20] Plaintiff would still need a prescription to obtain it. Again, Plaintiff does not allege **in** his Complaint and has not established that HCQ scarcity is the reason why his physician will not prescribe him the **drug**, which is currently available **in** the commercial **market**, such that an order from this Court would redress his injury.

Plaintiff lacks standing sufficient to invoke federal jurisdiction because he has shown neither a causal connection between his injury and the FDA's conduct, nor that an order from this Court granting him the relief he seeks would redress his injury. This case must be dismissed for lack of jurisdiction.

IV. Conclusion

Although this case is only a little over two months old, Plaintiff has filed more than ten motions or other pleadings seeking action from the Court and/or reiterating or adding to arguments previously made. Plaintiff filed several of these pleadings after the Court ordered the parties to submit no further briefing on the FDA's motion to dismiss. Further, it appears that this action is one of five cases that Plaintiff has filed **in** the District of Kansas since March 2019—**in** each case, Plaintiff sought a preliminary injunction against the state or federal [*21] government, and all of the cases have now been dismissed.⁶⁸ **In** one of Plaintiff's prior cases,

Jan. 7, 2020)* (dismissing action for lack of subject matter jurisdiction); *Goico v. Kansas, No. 20-CV-01026-2020 U.S. Dist. LEXIS 98900,*

Judge Thomas Marten took note of Plaintiff's "vexatious" approach to litigation, imposed certain filing restrictions, and cautioned him that "the court may impose further filing restriction as appropriate."⁶⁹

End of Document

This Court is deeply sympathetic to, and does not intend to *in* any way minimize, the stress and isolation Plaintiff is experiencing as a result of the COVID-19 virus. However, Plaintiff is cautioned to be mindful of the limited time and resources the Court has available to respond to repeated filings reiterating the same arguments and requesting the same relief. While this case did not reach the point at which the Court felt it necessary to impose formal filing restrictions, Plaintiff could face such restrictions *in* future cases if his current approach to litigation persists.

IT IS THEREFORE ORDERED BY THE COURT that Plaintiff's Motion for Permission to File a Rebuttal (Sur-Reply or Sur-Response) to [the FDA's] Reply Memorandum *in* Support of Defendants' Motion to Dismiss (Doc. 32) is **granted**. Plaintiff's sur-reply is deemed [*22] filed and has been considered by the Court *in* this Order. The FDA's Motion to Dismiss for Lack of Subject Matter Jurisdiction and Failure to State a Claim upon which Relief Can Be Granted (Doc. 22) is **granted** and this case is **dismissed**.

IT IS FURTHER ORDERED that Plaintiff's Motion to Join this Case with Case 20-1025 (Doc. 3), Emergency Motion for Preliminary Injunction (Doc. 4), Motion to Rebut (Doc. 20), Emergency Motion to Expedite Ruling on Defendant's Motion (Doc. 29), and Urgent Emergency Motion for Emergency TRO (Doc. 30) are **denied as moot**.

IT IS SO ORDERED.

Dated: December 3, 2020
